

Fleet Management in the Americas

Fleet Management in the Americas is the tenth consecutive report from Berg Insight analysing the latest developments on the commercial vehicle telematics market in the Americas.

This strategic research report from Berg Insight provides you with 330 pages of unique business intelligence, including 5-year industry forecasts, expert commentary and real-life case studies on which to base your business decisions.

Highlights from this report:

- **Insights** from 30 new executive interviews with market leading companies.
- **New** data on vehicle populations and commercial fleets in Americas.
- **Comprehensive** overview of the fleet management value chain and key applications.
- **In-depth** analysis of market trends and key developments.
- **Updated** profiles of 80 aftermarket fleet management solution providers.
- **Summary** of OEM propositions from commercial vehicle brands.
- **Revised** market forecasts lasting until 2024.

Berg Insight's M2M Research Series

What are the key business opportunities in the emerging wireless M2M/IoT market? Berg Insight's M2M Research Series is a unique series of 45 market reports published on a regular basis. Each title offers detailed analysis of a specific vertical application area such as smart homes, smart metering, fleet management and car telematics, or covers horizontal topics including IoT platforms, software, hardware, IoT connectivity statistics and the mobile operators' IoT strategies.

The top-25 FM providers in the Americas together have almost 10 million active units

Fleet management (FM) is an ambiguous term used in reference to a wide range of solutions for different vehicle-related applications. Berg Insight's definition of a fleet management solution is a vehicle-based system that incorporates data logging, satellite positioning and data communications to a backoffice application. The history of fleet management solutions goes back several decades. On-board vehicle computers first emerged in the 1980s and were soon connected to various satellite and terrestrial wireless networks. Today, mobile networks can provide ubiquitous online connectivity in many regions at a reasonable cost and mobile computing technology delivers very high performance, as well as excellent usability. All of these components combined enable the delivery of vehicle management, transport management, driver management and mobile workforce management applications linking vehicles and enterprise IT systems.

Commercial vehicle fleets play an essential role in the economy in both North and Latin America. In North America, there are approximately 14.4 million GVW 3–8 commercial vehicles in use. Around 18 million lighter vehicles including GVW 1–2 vehicles and cars with no GVW are also used by enterprises or public entities. In Latin America, the number of commercial vehicles in operation is estimated to 26.7 million, out of which 5.9 million are heavy trucks and 20.8 million are light commercial vehicles. The market for fleet management in the Americas has been in a growth period for many years. While the global recession associated with the ongoing COVID-19 pandemic has hampered developments in 2020 to some extent, the setbacks are expected to be temporary. The advanced North American market is among other things driven by regulatory developments such as the ELD mandates in the US and Canada. The Latin American market has often required an educational process to extend the perception of fleet telematics beyond security-related aspects. Latin American fleets have however also started to embrace optimisation functionality to an increasing extent.

Berg Insight expects the FM market to recuperate and show healthy growth in 2021–2024. In North America, the number of systems in active use is forecasted to grow at a compound annual growth rate (CAGR) of 15.0 percent from 11.0 million units in 2019 to 22.2 million units by 2024. The penetration rate in the total population of non-privately owned commercial vehicles is estimated to increase from 34.9 percent in 2019 to 62.0 percent in 2024. In Latin America, the number of systems in use is projected to increase from 3.8 million

► units in 2019, growing at a CAGR of 12.6 percent to reach 6.8 million units in 2024. The penetration rate in the region is estimated to increase from 13.9 percent in 2019 to 24.0 percent in 2024.

Geotab and Verizon Connect are the leading fleet telematics providers in the Americas. The two front-runners are the only players which have surpassed the milestone of 1 million active fleet management subscribers in the region. Additional providers with more than 0.5 million units include Trimble and Omnitracs, both active in the industry for decades, followed by the relative newcomer Samsara and the major video telematics player Lytx. The remaining top-10 players are Zonar Systems, Michelin, Fleet Complete and KeepTruckin. Michelin has established a strong position in the fleet management space through multiple acquisitions. There are more than 25 players with estimated installed bases of at least 0.1 million active fleet management units in the Americas, including also Gurtam, Teletrac Navman, CalAmp, PowerFleet, GPS Trackit, Azuga, Spireon, WideTech, GPS Insight, Pósitron, KORE Position Logic, J. J. Keller, Linxup, ORBCOMM, OnixSat, Autotrac and IntelliShift.

Most vehicle manufacturers now offer factory-installed fleet telematics solutions either independently or through partnerships. Examples of OEMs which have introduced systems in the Americas include PACCAR, Volvo, Daimler, Navistar, Ford, GM, Scania, Iveco, MAN, Hino, Isuzu, FUSO and Ram. The OEM telematics initiatives in the region have intensified over the years. Large installed bases are now found on the North American market, not the least for systems powered by established aftermarket fleet management solution providers. The activities are also increasing in Latin America. In the last few years, several of the commercial vehicle OEMs have extended their partnership strategies and started working with additional aftermarket telematics partners, enabling fleet customers to choose the systems which best match their specific needs. Some OEMs such as Ford and GM have also recently introduced new proprietary fleet telematics solutions offered as an alternative alongside a growing selection of partner-powered offerings. Notable fleet telematics providers working with OEMs include Verizon Connect, Geotab, Trimble, Zonar Systems, Platform Science, Fleet Complete, Samsara, Omniliink and Sascar. Solutions supplied by the OEMs are anticipated to increase in importance across both continents in the Americas in the coming years.

Installed base of active fleet management units (Americas 2019–2024)

This report answers the following questions:

- Will the FM industry consolidate further in 2021 and beyond?
- What is the geographical structure of commercial vehicle fleets in the Americas?
- Which are the leading international and regional providers of aftermarket fleet management solutions in the Americas?
- What offerings are available from commercial vehicle OEMs?
- How is the shift towards standard hardware affecting the market for fleet management solutions?
- How are the regulatory developments in the Americas affecting the fleet management industry?
- What differences are there between the North and Latin American markets?
- How will the commercial vehicle telematics industry evolve in the future?

Executive Summary

1 Commercial vehicle fleets in the Americas

1.1 The North American commercial vehicle market

- 1.1.1 Registrations of commercial vehicles GVW 3–8
- 1.1.2 Manufacturer market shares
- 1.1.3 Ownership structure
- 1.1.4 Trailers

1.2 The Latin American commercial vehicle market

- 1.2.1 Registrations of commercial vehicles
- 1.2.2 Manufacturer market shares

2 Fleet management solutions

2.1 Fleet management infrastructure

- 2.1.1 Vehicle segment
- 2.1.2 GNSS segment
- 2.1.3 Network segment
- 2.1.4 Backoffice segment

2.2 Vehicle management

- 2.2.1 Vehicle diagnostics and maintenance planning
- 2.2.2 Security tracking
- 2.2.3 Tire pressure monitoring systems
- 2.2.4 Fuel card integration and reporting

2.3 Driver management

- 2.3.1 Driving data registration and analysis
- 2.3.2 Video-based driver monitoring
- 2.3.3 Eco-driving schemes
- 2.3.4 Insurance risk management

2.4 Operations management

- 2.4.1 Routing and navigation
- 2.4.2 Transport management
- 2.4.3 Mobile workforce management

2.5 Regulatory compliance and reporting

- 2.5.1 CSA – Compliance, Safety, Accountability
- 2.5.2 Hours-of-Service and electronic logging devices
- 2.5.3 Fuel tax reporting
- 2.5.4 Distracted driving
- 2.5.5 Proposed anti-theft systems in Brazil
- 2.5.6 Other applications

2.6 Business models

3 Market forecasts and trends

3.1 Market analysis

- 3.1.1 Installed base and unit shipments – North America and Latin America
- 3.1.2 Regional markets
- 3.1.3 Vendor market shares
- 3.1.4 Trailer telematics
- 3.1.5 Construction equipment telematics

3.2 Market drivers and barriers

- 3.2.1 Macroeconomic environment
- 3.2.2 Regulatory environment
- 3.2.3 Competitive environment
- 3.2.4 Technology environment

3.3 Value chain analysis

- 3.3.1 Telematics industry players
- 3.3.2 Automotive industry players
- 3.3.3 Telecom industry players

- 3.3.4 IT industry players

3.4 Future industry trends

- 3.4.1 Fleet telematics remains a high-pace IoT market favoured by multiple trends
- 3.4.2 COVID-19 hits differently across sectors, spurs collaboration
- 3.4.3 Vehicle OEMs and aftermarket providers partner for factory-installed telematics
- 3.4.4 Industry consolidation fosters emergence of leading global telematics giants
- 3.4.5 Fuel card integration extends the capabilities of fleet telematics
- 3.4.6 Leading tire manufacturers heavily involved in the fleet telematics space
- 3.4.7 Hardwired, mobile and hybrid telematics systems to co-exist
- 3.4.8 The FMCSA now lists more than 600 self-certified ELDs from diverse players
- 3.4.9 Upselling of value-added services to drive uptake beyond the ELD basics
- 3.4.10 Video-based solutions continue to permeate the fleet market
- 3.4.11 Fleet insurance telematics is an opportunity to reduce fleet risks
- 3.4.12 The Internet of Transportation Things expands the addressable market

4 OEM products and strategies

4.1 Daimler Group

4.2 Ford

4.3 General Motors

4.4 Hino Trucks

4.5 Iveco

4.6 MAN Latin America

4.7 Navistar

4.8 PACCAR

4.9 Scania

4.10 Volvo Group

5 International aftermarket solution providers

5.1 Ctrack (Inseego)

5.2 Fleet Complete

5.3 Garmin and partners

5.4 Geotab

5.5 Gurtam

5.6 KORE Position Logic

5.7 MiX Telematics

5.8 Omnitrac

5.9 Teletrac Navman

5.10 Trimble

5.11 Verizon Connect

5.12 Webfleet Solutions (Bridgestone)

6 Regional aftermarket solution providers

6.1 North America

- 6.1.1 Azuga
- 6.1.2 CalAmp
- 6.1.3 Certified Tracking Solutions
- 6.1.4 Connexas Group (AddSecure)
- 6.1.5 Coretex
- 6.1.6 CyntrX (Radius Payment Solutions)

6.1.7 Donlen

6.1.8 EROAD

6.1.9 FieldLogix

6.1.10 Fleeteye

6.1.11 Fleet Freedom

6.1.12 Fleetilla

6.1.13 Forward Thinking Systems

6.1.14 GPS Insight

6.1.15 GPS Trackit

6.1.16 GreenRoad

6.1.17 IntelliShift

6.1.18 ISAAC Instruments

6.1.19 J. J. Keller

6.1.20 KeepTruckin

6.1.21 Linxup

6.1.22 Lytx

6.1.23 NexTraq (Michelin)

6.1.24 ORBCOMM

6.1.25 Pedigree Technologies

6.1.26 Platform Science

6.1.27 Positioning Universal

6.1.28 PowerFleet

6.1.29 Quartix

6.1.30 RAM Tracking

6.1.31 Rand McNally

6.1.32 Samsara

6.1.33 SkyBitz (AMETEK)

6.1.34 Spireon

6.1.35 Vecima Networks

6.1.36 WEX

6.1.37 Zonar Systems (Continental)

6.2 Latin America

6.2.1 Autotrac

6.2.2 CarrierWeb

6.2.3 Copiloto Satelital (Michelin)

6.2.4 Encontrack

6.2.5 FleTrack

6.2.6 Ful-Mar

6.2.7 Global Track

6.2.8 GPS Chile

6.2.9 GPS7000

6.2.10 Grupo UDA

6.2.11 Grupo Ultra (ULTRACK)

6.2.12 Hawk GPS

6.2.13 Ituran

6.2.14 Locatelia

6.2.15 Location World

6.2.16 Maxtrack

6.2.17 Omnilink (Show Tecnologia)

6.2.18 OnixSat

6.2.19 Optimus Fleet

6.2.20 Póstron (Stoneridge)

6.2.21 Rastroo Satelital

6.2.22 Redd

6.2.23 Ruptela

6.2.24 Sascar (Michelin)

6.2.25 Satrack

6.2.26 SHERLOG Technology

6.2.27 SIGhRA

6.2.28 Soltrack

6.2.29 Ubicamóvil

6.2.30 WideTech

6.2.31 Wisetrack
