5.2 Revenue forecasts 253
5.2.1 Medical monitoring devices 254
5.2.2 mHealth connectivity solutions 255
5.2.3 Care delivery platforms 256
5.2.4 mHealth care programs 257
5.3 Industry trends and analysis 258
5.3.1 Connectivity strong trend when new players enter the market 258
5.3.2 Major pharmaceutical companies prepare large-scale rollouts 261
5.3.3 Consumerisation of medical-grade mHealth devices and apps 262
5.3.4 BYOD is becoming a popular and viable option 264
5.3.5 Digitalisation of PSTN networks in the works 265
5.3.6 Modularization of the value chain as the market matures 266
5.3.7 Automated external defibrillators are getting connected 267
5.3.8 The data war has started 268
5.4 Market drivers and barriers 269
5.4.1 An ageing population is raising medical costs 270
5.4.2 Obesity epidemic and Increasing welfare disease prevalence 270
5.4.3 Increased focus on disease prevention 271
5.4.4 Substitutes to medical monitoring 272
5.4.5 A slowly changing industry 273
5.4.6 Alignment of financial incentives 273
5.5 Potential market catalysts 274
5.5.1 Increased monitoring during clinical trials 274
5.5.2 Incentives from insurance companies and payers 275
5.5.3 National health systems support remote monitoring 275
5.5.4 New clinical evidence on cost effectiveness 276
